

WHITEPAPER

Project Name : Global Currency Token & USDI

INTRODUCTION

Global currency token is a similar project to binance.

Global currency token called GCT will be accompanied by its own stablecoin named USDI which will serve as its support such as bnb and busd or luna and ust

ABOUT

GCT & USDI will first be on the Binance smart chain network, then we will expand usdi on the Ethereum, Tron, Polygon and other networks.

We will have our own DEX and CEX with our own blockchain create our market place for NFTs and enter the Metaverse.

FEATURES

Community Driven & BSC Based Ecosystem

We trust the power of the Diamond hands and of the BSC ecosystem and we believe our community.

We will start as bsc token and continue as defi platform

Join us and stay SAFUU

ROADMAP

Phase 1

ABOUT USDI

USDI is stablecoin like usdt ust busd or usdc.

1 usdi = 1 usdt

1 usdi = 1 busd

1 usdi = 1 usdc

the private sale of usdi will be done one or 2 weeks before the GCT fairlaunch on Pinksale.

We didn't mention airdrop because we are going to create a new way

For any purchase of \$100 you will receive \$110 in usdi during the private sale

which means that each investor will receive a 10% bonus on their investment
